JAMIAH MCQUILLER

CYBERSECURITY ANALYST | VULNERABILITY & SECURITY OPERATIONS

Flint, MI 48505 | (810) 406-3565 | jamiah_mcq@yahoo.com | LinkedIn

Cybersecurity and IT professional with hands-on experience in vulnerability management, endpoint security, security operations, email security, identity and access management, and compliance across government and enterprise environments. Managed 1,392 enterprise endpoints and reduced identified vulnerabilities from 1,050 to 105 (90% reduction) through prioritized remediation and controlled patch deployment. Experienced with ManageEngine Endpoint Central, Cymulate, Barracuda Email Security, Okta, Zscaler, CrowdStrike security controls, PowerShell, GCP, and Microsoft technologies. CompTIA Security+ certified.

AREA OF EXPERTISE

Vulnerability Management: Vulnerability Assessment, CVE Analysis, Remediation, Patch Management, Risk Prioritization, Remediation Validation
Security Operations: Endpoint Security, EDR, BAS/Security Control Validation, Incident Triage, Email Security, Phishing Analysis
Security Platforms: ManageEngine Endpoint Central, Cymulate, Barracuda Email Security, CrowdStrike Falcon, Okta, Zscaler, Wireshark, pfSense
Cloud & Automation: Google Cloud Platform (GCP), PowerShell, Python, Microsoft 365, Power Platform, Infrastructure Automation
Compliance & Governance: CJIS, HIPAA, Security Controls, Audit Readiness, SOP Development, Compliance Reporting, Remediation Tracking

PROFESSIONAL EXPERIENCE

IT End User Computing Technician, Genesee County — Mar 2026 - Present

- Managed vulnerability remediation across 1,392 enterprise endpoints, reducing identified vulnerabilities from 1,050 to 105 — a 90% reduction — through prioritized remediation and controlled patch deployment using ManageEngine Endpoint Central.
- Investigated software vulnerabilities and CVEs, assessed affected endpoints, prioritized remediation activities, and coordinated security update deployments through centralized endpoint management.
- Administered patch policies, deployment groups, testing workflows, maintenance windows, reboot coordination, and remediation reporting; developed staged deployment and validation processes to reduce operational risk.
- Supported HIPAA and CJIS audit readiness through security control validation, remediation tracking, technical documentation, compliance activities, and reporting; maintained controls and evidence workflows in Strike Graph.
- Configured and executed Cymulate breach-and-attack simulation (BAS) activities to validate security controls, identify detection gaps, and coordinate required endpoint/security exclusions and scoping with security stakeholders.
- Investigated phishing, spam, suspicious links, and business-email-compromise activity using Barracuda Email Security, including log review, message analysis, blocking malicious or impersonating senders, and documenting remediation in service tickets.
- Developed SOPs and technical documentation for vulnerability remediation, security patching, endpoint management, operational procedures, and change-controlled deployments.

Best Buy — Consultant Agent — Oct 2024 – Dec 2024

- Diagnosed and resolved hardware, software, operating system, and connectivity issues across laptops, desktops, and mobile devices.
- Assisted with device setup, configuration, troubleshooting, and secure endpoint practices in a customer-facing technical environment.

IT Co-op, Nexteer Automotive — Aug 2023 - Aug 2024

- Supported identity and access management processes using Okta and Zscaler security platforms.
- Built, configured, and deployed enterprise endpoints following corporate security, imaging, and configuration standards.
- Managed incident triage, escalation, and documentation through ServiceNow ITSM while maintaining SLA requirements.
- Provided technical support for Microsoft 365, Teams, SharePoint, endpoint synchronization, and software provisioning.
- Collaborated with cross-functional IT teams to troubleshoot infrastructure, access, endpoint, and security-related issues.
- Contributed to workflow automation and process-improvement initiatives using Microsoft Power Platform technologies.

Cloud Engineering Participant — Google Cloud Career Jumpstart Program — Aug 2022 – Dec 2022

- Configured Google Cloud resources, access controls, and security settings through hands-on cloud engineering exercises.
- Deployed and monitored cloud applications while developing practical experience with GCP, IAM, and cloud operations.
- Applied cloud infrastructure and security concepts through structured Google Cloud training and projects.

EDUCATION

Master of Science in Cybersecurity — Jan 2026 - Dec 2026
Concentration: Network & System Security
University of Michigan - Flint

Bachelor of Science in Cybersecurity — Jan 2023 - Dec 2025
Minor in Computer Science, Honors: University Honors Recipient
University of Michigan - Flint

CERTIFICATIONS

CompTIA Security+ (SY0-701) — Sept 2026 - Sept 2029
